GREENLIGHT CYBER

Guardian ITDR for Microsoft 365

24x7 protection against Microsoft 365 account takeover and business email compromise.

ATTACKERS NO LONGER NEED TO BREAK INTO YOUR NETWORK. IF THEY CAN LOG IN AS ONE OF YOUR USERS, THEY CAN:

- Change invoice and payment details
- Impersonate executives and vendors
- Read sensitive email and files
- Quietly move data out of Microsoft 365

Most small and mid-sized organizations do not have the tools or time to watch Microsoft 365 identities around the clock.

GREENLIGHT CYBER

WHAT IS GUARDIAN ITDR FOR MICROSOFT 365?

Guardian ITDR is a managed Identity Threat Detection and Response service focused on Microsoft 365.

The service continuously analyzes:

- Entra ID sign-ins and sessions
- Exchange Online mailbox changes and activity
- SharePoint and OneDrive file access and sharing
- Teams and other core Microsoft 365 services

When behavior looks like an account takeover rather than a user mistake, the Greenlight Cyber team investigates and responds.

Key Capabilities :

1

24X7 IDENTITY MONITORING

Continuous monitoring of risky logins, MFA changes, new devices, and new locations.

2

DETECTION TUNED FOR FRAUD AND ACCOUNT TAKEOVER

Focus on business email compromise, MFA bypass, token theft, and mailbox rule abuse.

3

FAST CONTAINMENT AND CLEANUP

Sessions are revoked, malicious rules are removed, and accounts are secured per your playbooks. Users are guided through safe password resets so they can get back to work quickly.

4

ROLE-BASED REPORTING

Plain-language summaries for leaders and detailed timelines for IT and security teams.

5

LICENSE FRIENDLY AND SCALABLE

Works with any Microsoft 365 tier, on a simple per-user monthly subscription that scales from a handful of users to thousands.

GREENLIGHT CYBER

Benefits:

- Lower risk of payment diversion and wire fraud
- Better protection for executives, finance, and high-risk accounts
- Stronger evidence for cyber insurance and compliance conversations
- Less time spent chasing confusing identity alerts
- Confidence that someone is watching Microsoft 365, day and night

How To Get Started:

1

MICROSOFT 365 IDENTITY RISK ASSESSMENT
Review the last 6 months of Microsoft 365 activity to identify any past or current account compromises.

2

ONBOARD TO GUARDIAN ITDR
Connect your tenant, baseline normal behavior, and agree on remediation playbooks.

3

ONGOING 24X7 PROTECTION
The Greenlight Cyber team monitors, investigates, and responds to identity threats as they occur, then helps you strengthen controls over time.

LET OUR TEAM SEE IF YOUR MICROSOFT 365 HAS ALREADY BEEN TARGETED.
